

ARCAM

Muso Speaker / Logo Subwoofer

- Flexible setup options - 2.0/2.1/5.1
- Stunning sound quality from music and movies
- Muso - compact and stylish high performance mini monitor
- Logo - discrete but powerful sub woofer system
- Perfect match for Solo Music or Movie systems

The Arcam Solo Music and Movie systems have redefined what can be achieved with an all-in-one system. Their unique combination of discrete styling, ease of use and stunning sound and picture quality have led to phenomenal success with thousands of delighted owners worldwide.

To complement Solo systems, Arcam is proud to introduce the Muso / Logo speaker system. Designed with Solo systems firmly in mind, the Muso and Logo complement Solo beautifully with discrete looks and stunning performance. Construction uses the very latest techniques including combined aluminium / steel enclosures (Muso) and the very latest driver technology.

Offered in fully flexible combinations, the Muso two-way speaker offers a bass performance far beyond that of a typical "satellite" speaker, meaning it can be used as a simple stereo pair when placed close to a wall. With the addition of the Logo sub woofer, a full range system can be configured for stereo music or movie systems. However, it is in the full 5.1 combination where the Muso / Logo really shines, offering a dynamic performance that would put many a "big box" speaker to shame.

Available June 2007

E&OE (May 2007)

Muso Speaker / Logo Subwoofer

Technical Details

Muso

- Two-way bass reflex loudspeaker system
- Front ported design allows positioning close to walls or in cabinet fixtures
- Combined aluminium / steel enclosure – extremely “dead” cabinet
- Resin damped metal to metal bonding with no visible fixings
- “SDA” sound dead Aluminium further dampens cabinet resonance
- 25mm (1”) Ultra light Aluminium dome magnetically screened tweeter
- Aluminium tweeter dome for ultra light weight and maximum stiffness
- Magnetically mounted, acoustically transparent tweeter sub grill
- 85mm (3.5”) Polymer / Aluminium cone magnetically screened woofer
- Vented pole piece woofer magnet offering lower distortion
- Smooth flow, flared “L shape” port offers extended bass response
- 8 component crossover with air-cored HF inductor on Glass Fibre PCB
- Gold plated 4mm binding posts
- Compliant rubber isolation mat included

Logo

- 10” flat diaphragm ultra long throw magnetically shielded driver
- 2” driver voice coil
- 200watt class D cool running amplifier offers control with dynamic power
- Left, Right and LFE inputs on RCA Phono jacks
- Left, Right and LFE loop-through outputs on RCA Phono jacks
- 18mm MDF braced and damped cabinet construction
- Down firing driver for ease of placement and integration
- Back panel controls for:
 - Cross over frequency (35-160Hz)
 - Cross over “Q” (0.3-1.5)
 - Volume
 - Phase (0 or 180degs)
 - Power on/off
 - Mains on / off
- Universal power supply for worldwide compatibility (100-250v)

General

- Muso offered as single units for maximum configurability
- Superb sound quality for music and movies
- Ideal partners for Solo Music and Movie systems
- Dimensions (W x D x H):
 - Muso – 120 x 155 x 230mm (4.7 x 6.1 x 9.1 inches)
 - Logo – 295x300x430mm (11.6 x 11.8 x 16.9 inches)
- Weights:
 - Muso – 3Kg / 6.6lbs (3.3Kg / 7.3lbs packed)
 - Logo – 15Kg / 33lbs (18Kg / 40lbs packed)
- Optional Muso floor stand and wall bracket available
